(206) - 214-8363

WEB DESIGNER, DEVELOPER

---

**Objective**      To work in a creative environment where I can apply my knowledge of, and passion for web based technologies.

---

## Skills

### Web Design

Assertively exploit wireless initiatives rather than synergistic core competencies.

### Interface Design

Credibly streamline mission-critical value with multifunctional functionalities.

### Project Direction

Proven ability to lead and manage a wide variety of design and development projects in team and independent situations.

---

## Technical

XHTML

Jquery

Eclipse IDE

CSS

Prototype / Script.aculo.us

Visual Studio 2008

Javascript

Flash CS4 / ActionScript 3

Photoshop CS4

AJAX

Apache / PHP 5 / SQL

Windows / OS X / Linux

---

## Experience

The Seattle Times

## Web Developer / Designer

April 2009 - May 2009

This was a contract position at The Seattle Times through Rylem, Inc. I transformed the redesign of their NW Homes / NW Rentals portal pages into web pages. Work included writing custom scripts to parse complicated third-party XML feeds, and using the data to build image carousels and article lists.

I was offered a full-time position after the project was completed ahead of schedule.

---

## POP design+technology

May 2006 - March 2009

### Web Developer

At POP, I worked on several high-profile sites including:

Tetris Party website - <http://www.tetrisparty.com>

- I used the ZEND Framework's locale module for multiple language support instead of the usual practice of duplicating the entire site several times.
- Hand-coded all XHTML, CSS, and PHP

Lyric Opera - <http://www.lyricopera.org>

- I worked closely with .NET software developers to build the first site using POP's new AJAX-powered JavaScript library.
- Hand-coded all XHTML, CSS, JavaScript

Tully's corporate site - <http://www.tullys.com>

- To create a unique and exciting coffee filtering widget, I collaborated with the Flash developer by writing JavaScript functions that could be called from the swf file.
- Hand-coded all XHTML, CSS, and JavaScript

The Metropolitan Opera website - <http://www.metoperafamily.org/metopera/>

- Filled the unglamorous, but important roll of maintaining the giant Metropolitan Opera website.
  - Hand-coded all XHTML, CSS, and JavaScript
-
